INTRO TO SWIFT

XCODE 6.X

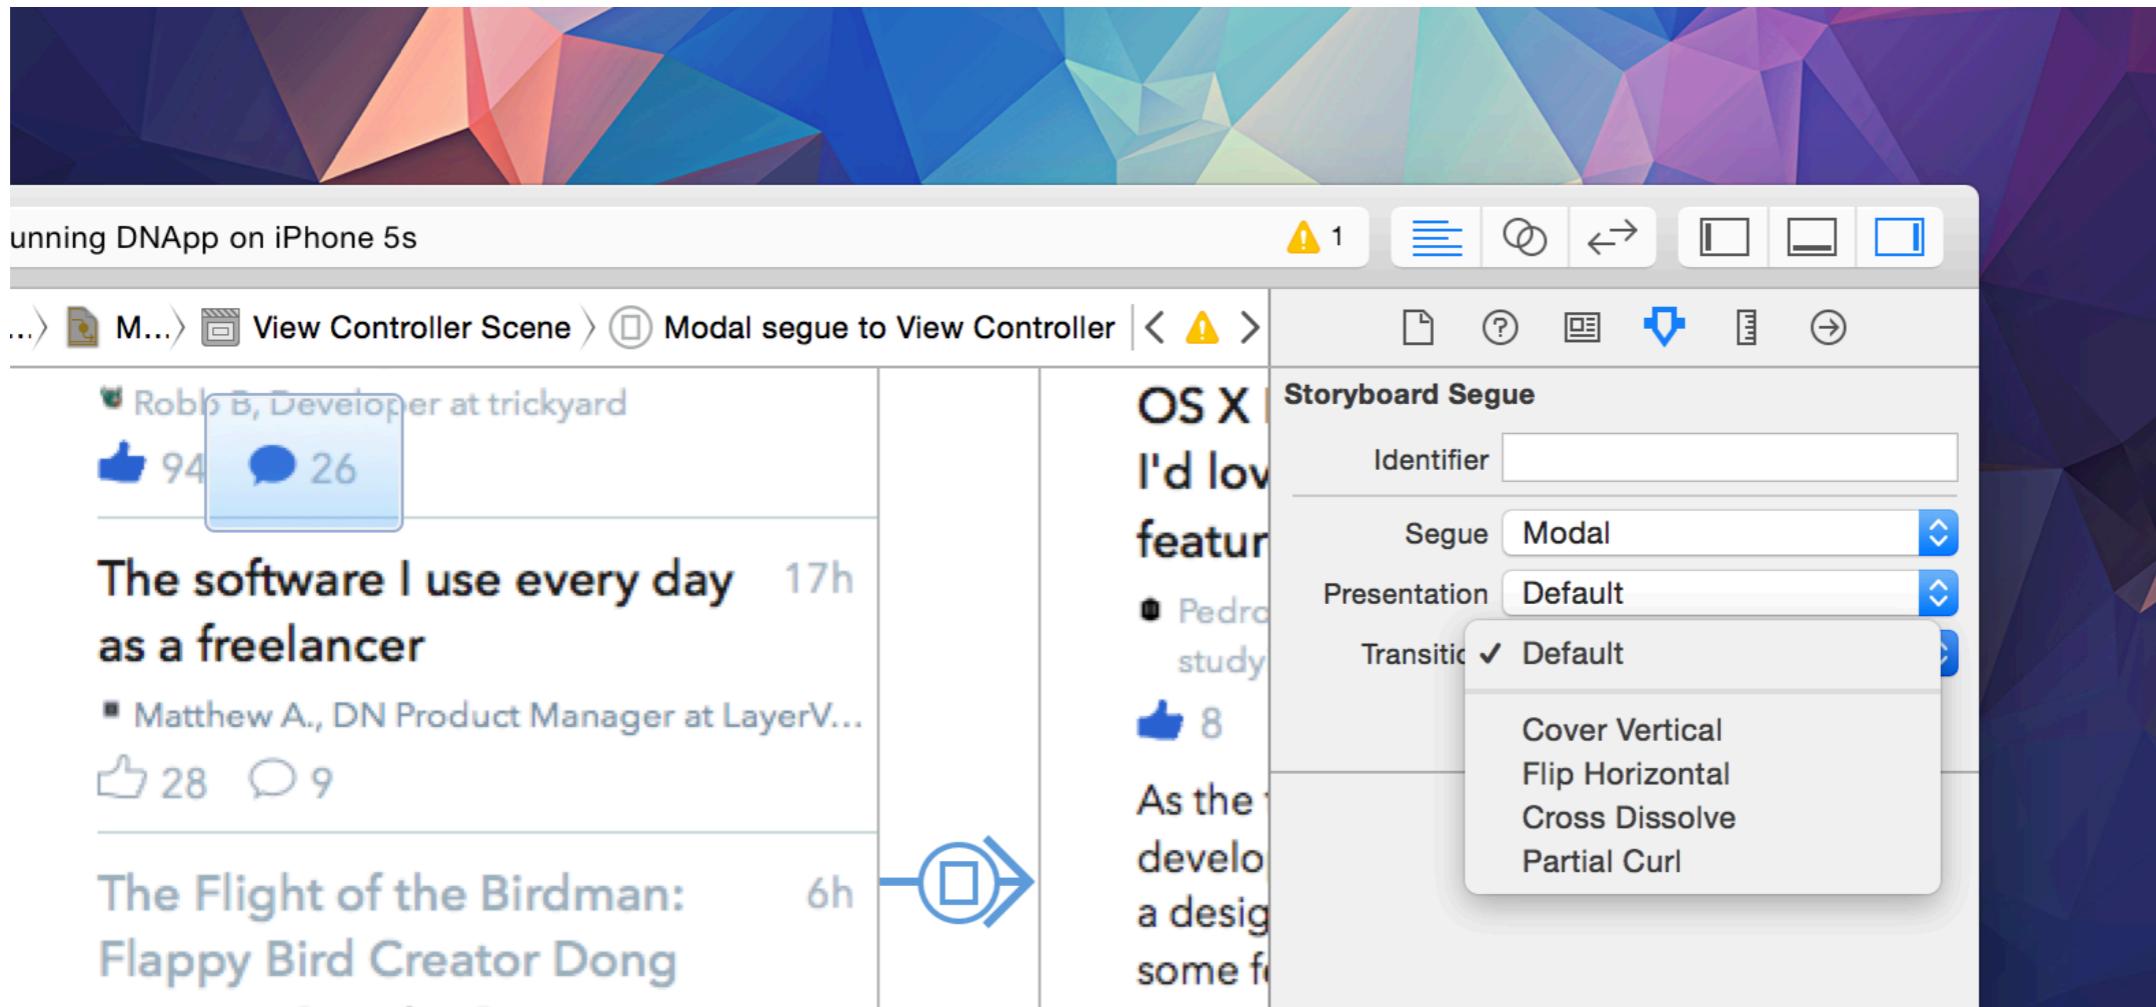

ENABLE AUTO LAYOUT

CREATING A SEGUE

EDITING THE SEGUE

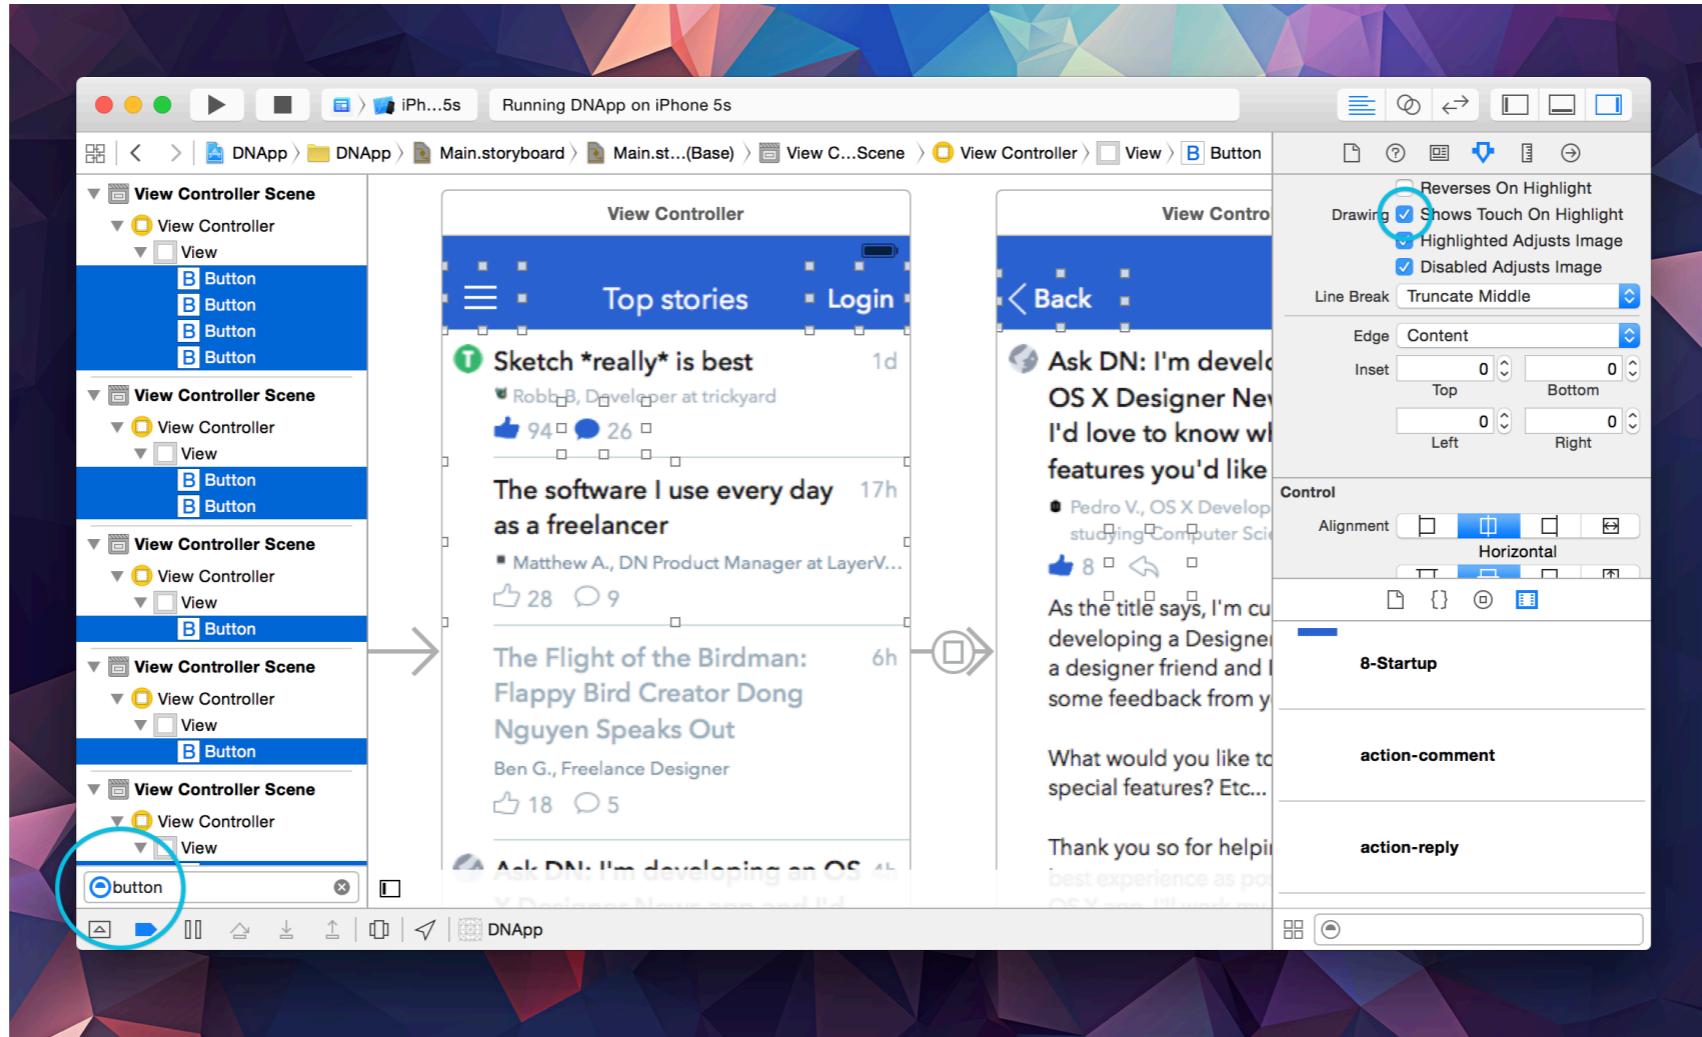

DISMISSING THE SEGUE

To perform an unwind segue, go to the view controller that you want to segue to and add the following function

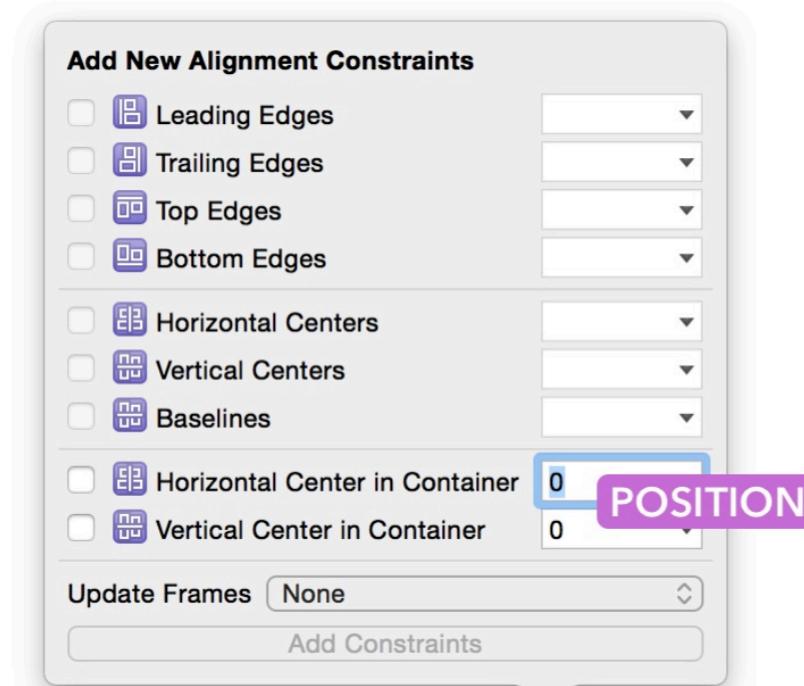

```
@IBAction func unwindToMainMenu(segue: UIStoryboardSegue) {  
    // No code needed here  
}
```

SHOW TOUCHES ON HIGHLIGHT

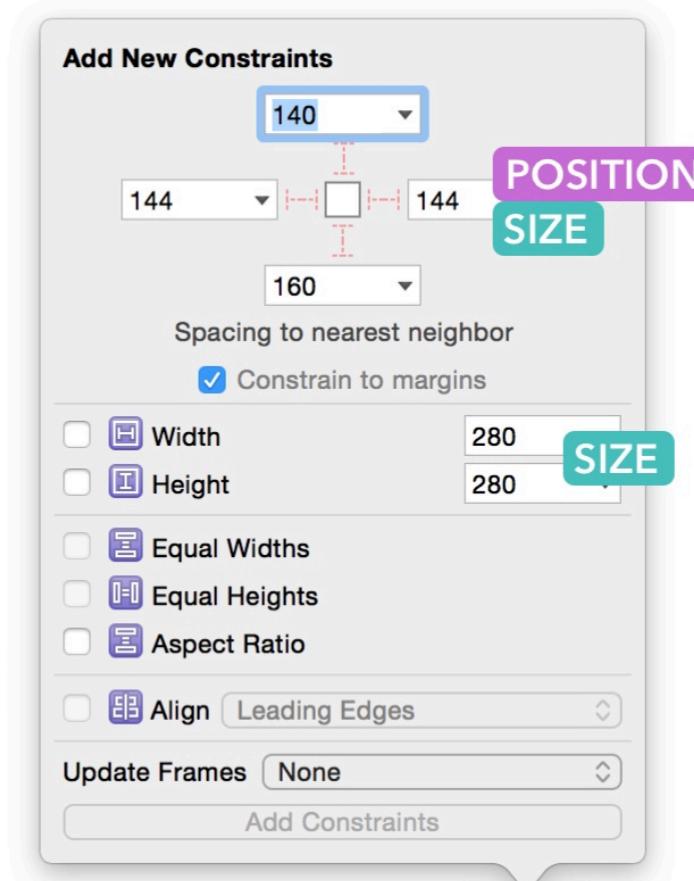

POSITION AND SIZES WITH AUTO LAYOUT

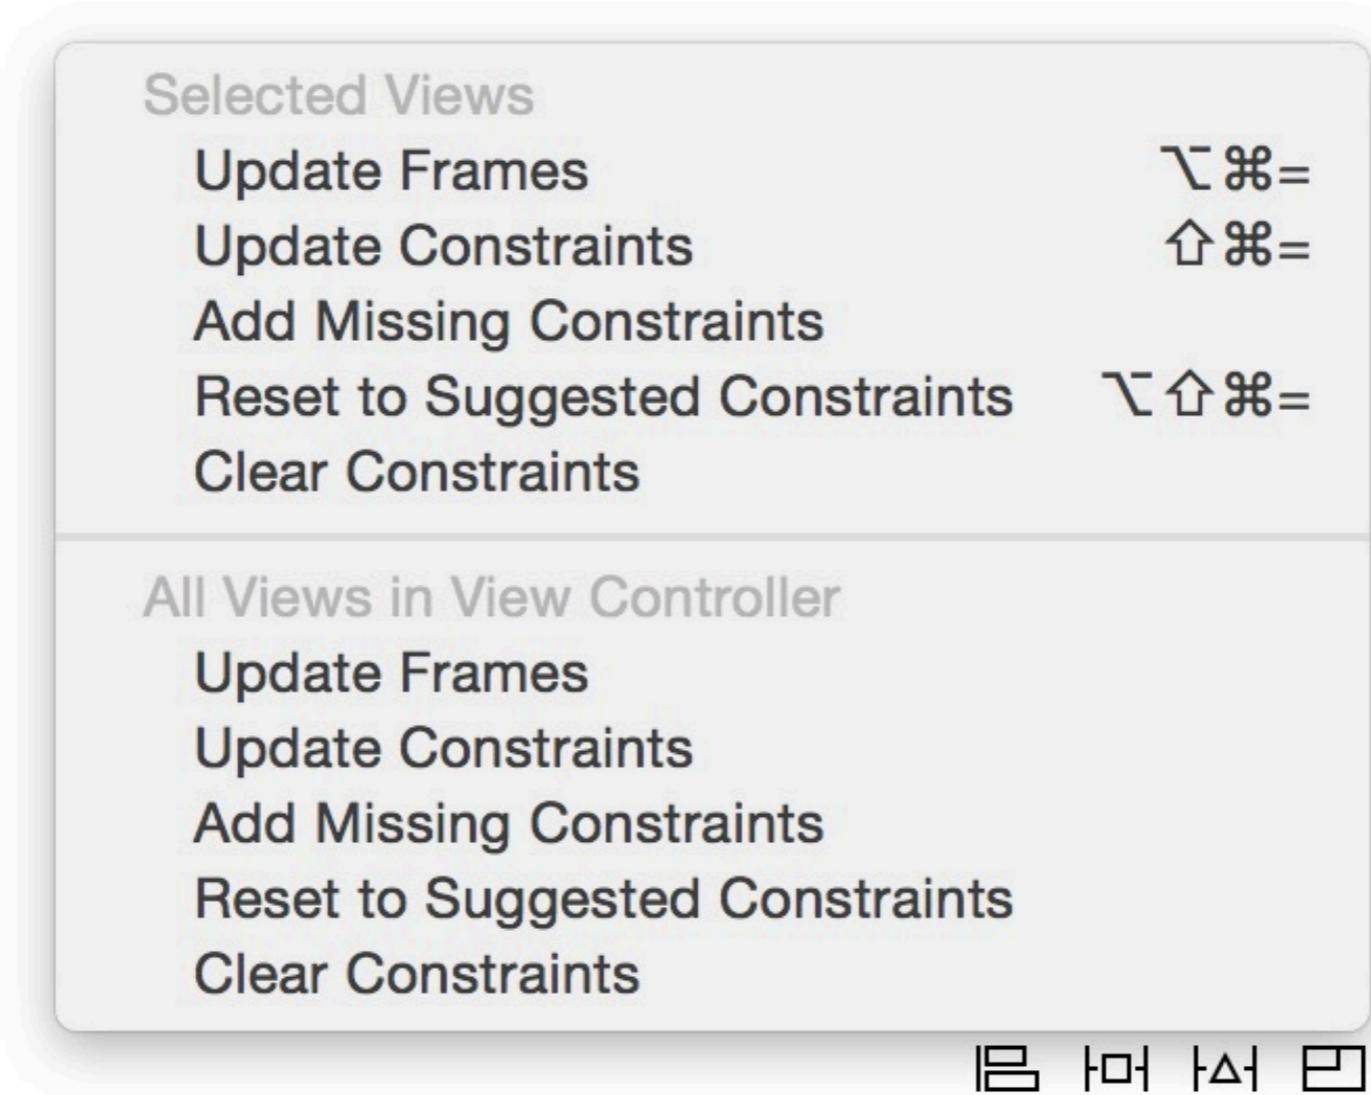

ALIGN

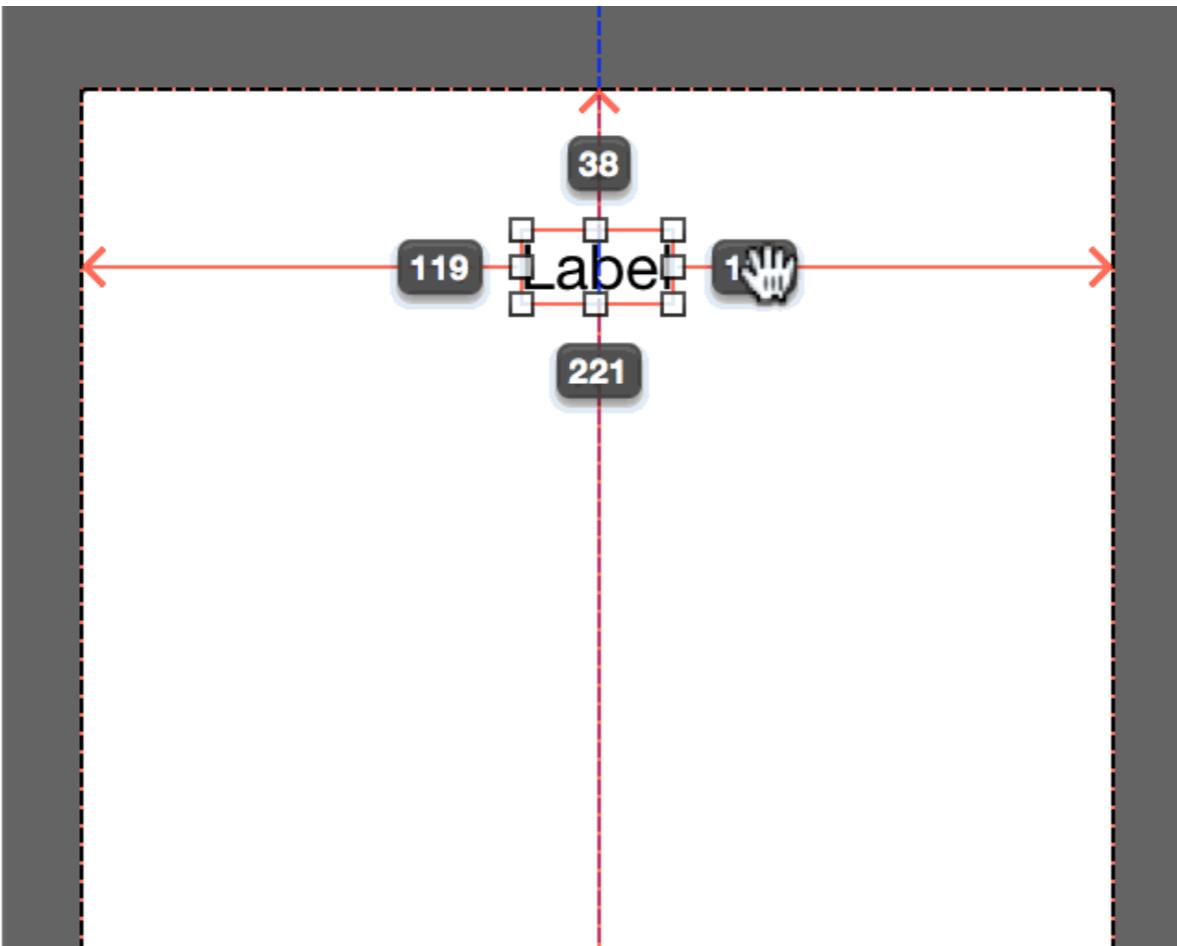

PIN

RESOLVING AUTO LAYOUT ISSUES

DESIGNING IN STORYBOARD

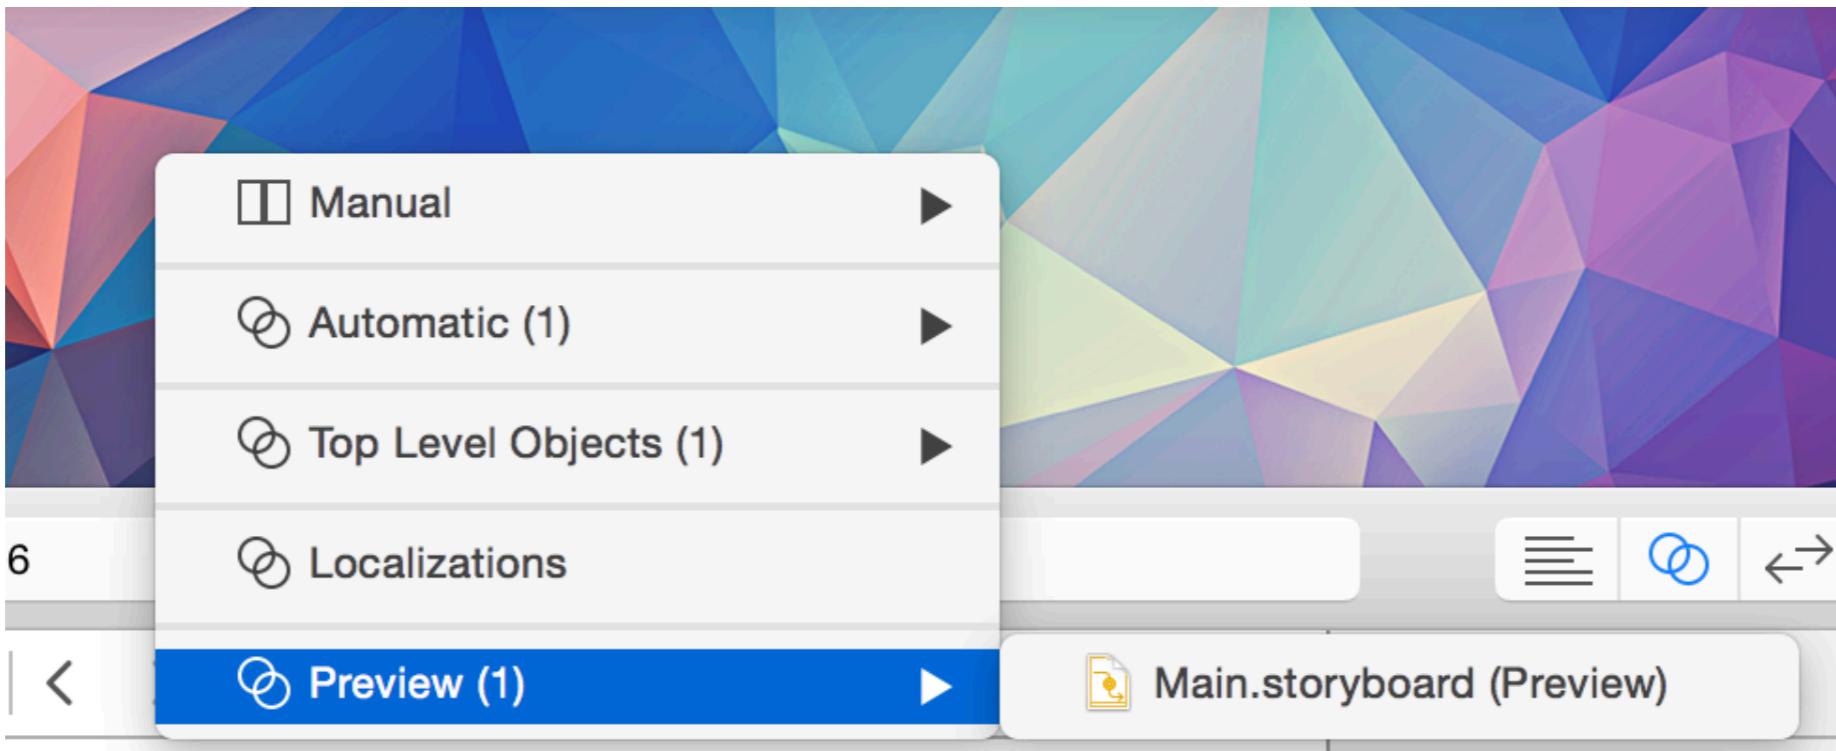

Label Label - A static text.

Button Button - I sends an action object when

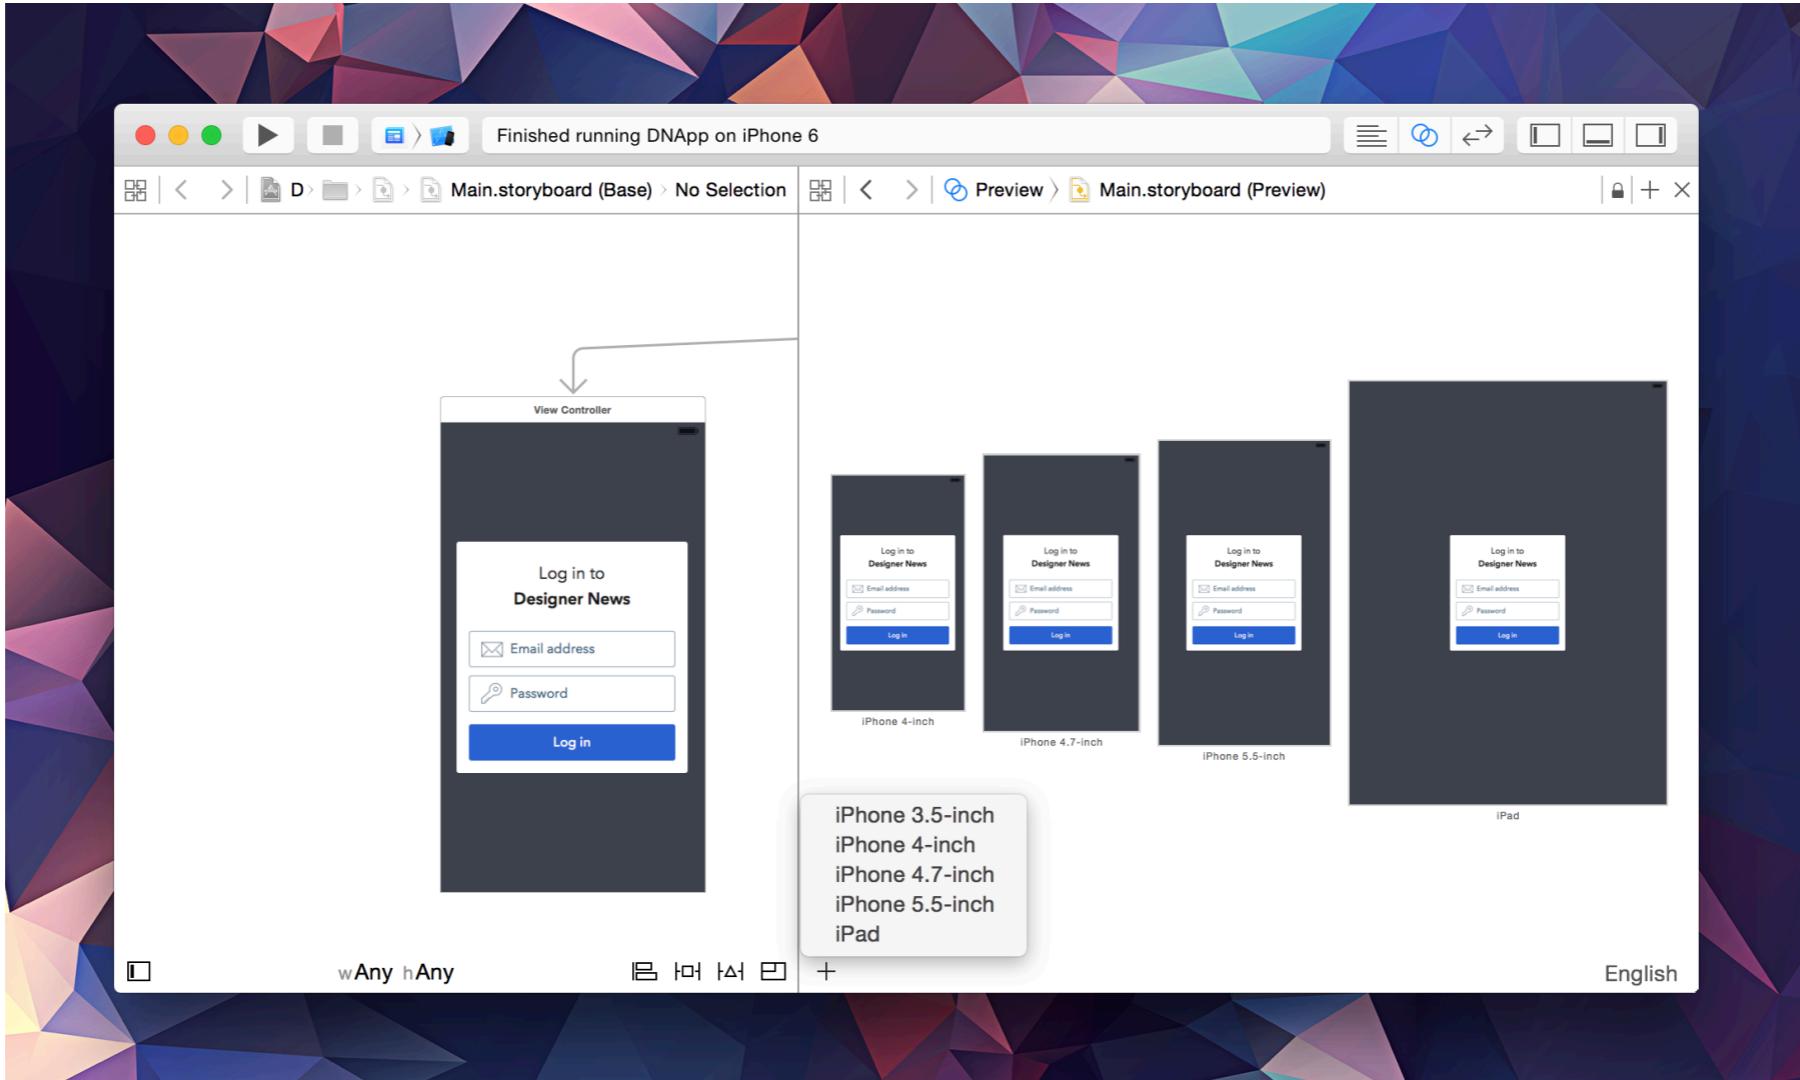

Segmented Control multiple selection functions are

Text Field and sends target obj

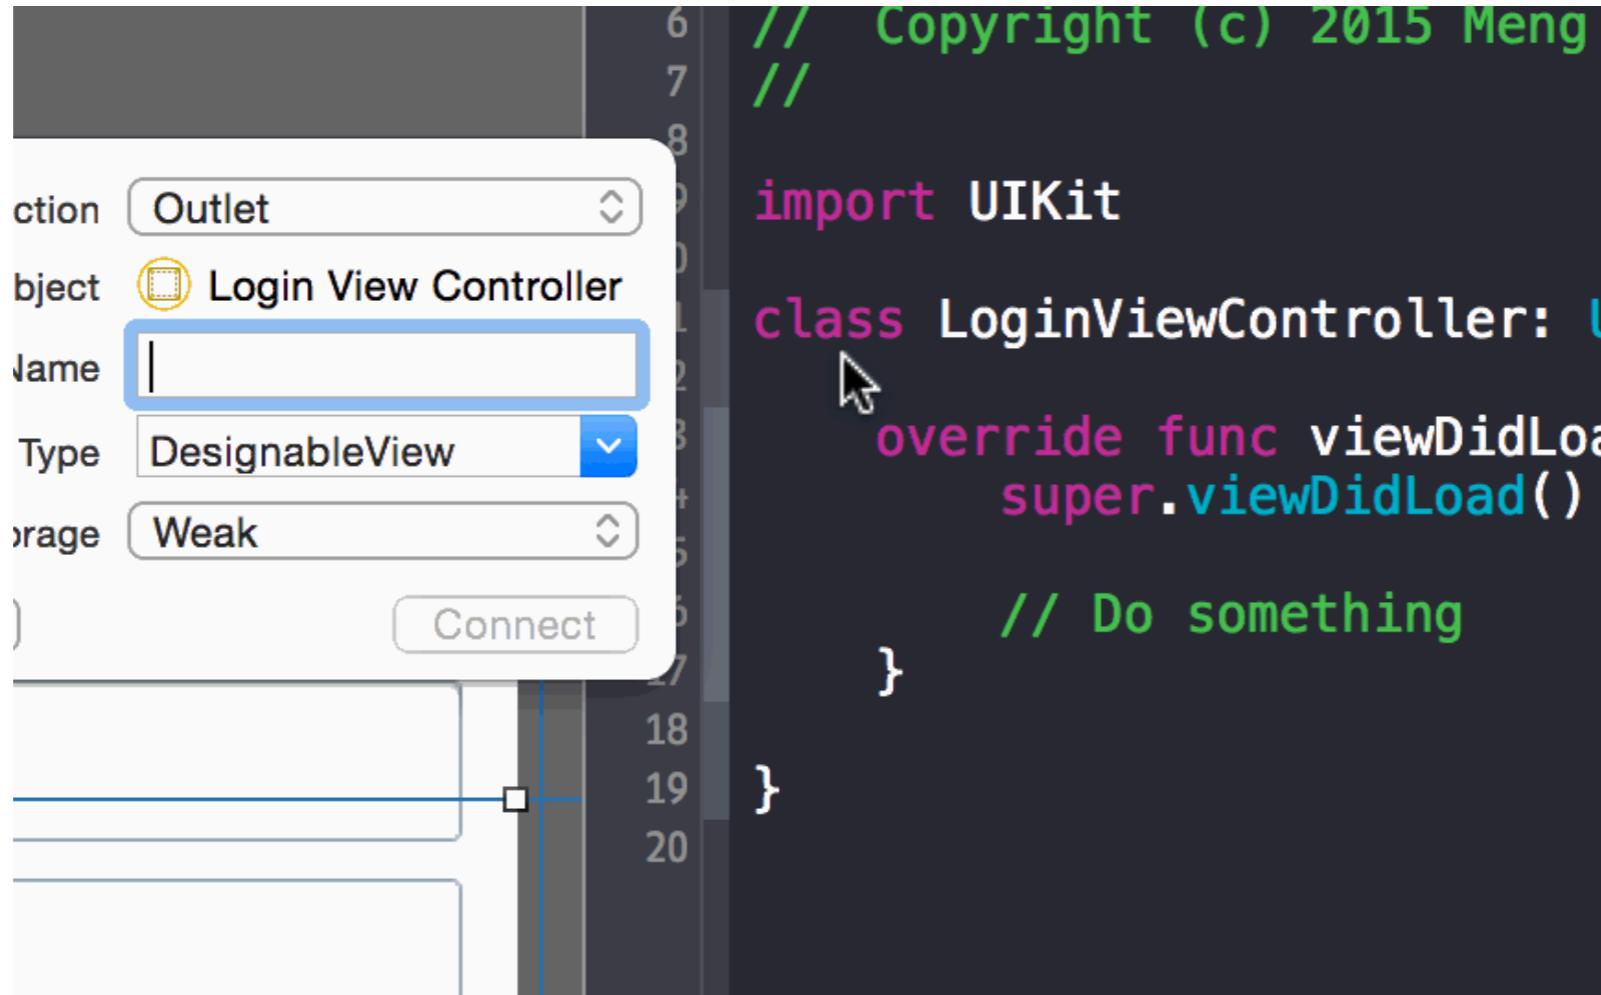

ENABLE PREVIEW IN STORYBOARDS

THE PREVIEW TOOL

CREATING IBOUTLETS AND IB ACTIONS

REMOVE BREAKPOINTS

```
11 class StoriesTableViewController:  
12  
13  
14 }  
15 }  
16  
11 class StoriesTableViewController:  
12  
13  
14 }  
15 }  
16
```

ADDITIONAL SHORTCUTS

- ▶ ⌘ + ⌂ + j *Reveal in project navigator*
- ▶ ⌂ + ⌂ (Opt) + Click *Open file in new or existing tab*
- ▶ ⌂(CTRL) + i *Reindent the selected text*
- ▶ ⌘ + E *Find based on current selection*
- ▶ ⌘ + f *Show in find bar*
- ▶ ⌘ + g *Find next*

THANKS!

GIORGIO NATILI
